

Join **ADI1 GAMES** and become part of a team that's redefining the future of gaming and interactive learning **in Guatemala City!** You'll collaborate with passionate software engineers, creative UI/UX designers, and visionary game developers to build highly interactive games that inspire, educate and entertain. We thrive in an open, inclusive, and innovative environment where ideas flow freely and fun is part of the job. If you love pushing boundaries in game app development, this is your chance to make an impact while doing what you love. Let's create games that change the way the world learns, together!

Our priority at **ADI1** is developing top quality innovations. If A.I. is your A-game, bring it!

## **UI/UX Designer**

*This is a full-time position based in Guatemala City, around Zone 10. We work together on-premises and enable working remotely once a week.*

### **Minimum Qualifications**

- Degree in UI/UX Design, Game and Character Design, and/or related fields.
- 2+ years of experience in UI/UX design for digital applications.
- Ideal: certificate(s) in design software for UI, concept art and animation.
- Strong communication and organizational skills.
- Strong knowledge of English (reading and writing).

### **Technical Experience**

- Strong ability and talent to create **engaging** visuals, characters, and game interfaces.
- Solid experience with advanced designer tools, such as Figma, Adobe XD, Sketch, ...
- Solid experience creating 2D/3D concept art and animations.
- Solid experience building responsive user interfaces in app development or similar scenarios.
- Ideal: experience with AI-assisted tools for animating visuals and/or for character enhancement.
- Familiarity with Agile workflows and collaboration tools.

### **Role**

- Design intuitive and visually stunning interfaces.
- Collaborate with developers to ensure seamless integration of UI elements.
- Create animations and interactive components that enhance the user experience.
- Conduct user testing and iterate designs based on feedback.
- Stay ahead of design trends and bring fresh ideas to the table.
- Participate in brainstorming sessions and Agile ceremonies.
- Make the game environment engaging and entertaining— and maybe win at our foosball table too!

Ready for your next step into game dev like the pros?
